Experience

■ Product Design + Client Lead, Honda (MCHI Capstone Project)

January 2021 - August 2021, Pittsburgh, PA

- Led research initiatives resulting in insights that identified a strong design opportunity from a broad problem space.
- Designed a framework to create multimodal game experiences that take advantage of the unique affordances of the car, resulting in design and testing of 7 prototypes.
- Created concept of the car as a data-driven game console, fostering connection for families. Client plans on implementing the concept in upcoming electric vehicle project.

■ Lead - Product Design, Upstart

July 2017 - October 2018, Singapore

- Led product design team end to end from idea to launch of online legal product.
- Worked with founder to define product vision and strategic direction.
- Through prototype testing, identified a key product issue and helped the business pivot strategic direction.
- Reduced time lawyers spent on documents by 15% + reduced cost of legal for startups by up to 70%.

■ Strategist - Advertising + Brand, LoyaltyOne

Strategist

2014 -2015, Toronto, Ontario

Account Supervisor, Digital + Innovation

2008 -2014, Toronto, Ontario

- Led agency rebranding of Canada's largest loyalty program, AIR MILES Reward Program, impacting 10 million active users.
- In response to tight deadlines and resource limitations, I designed and earned buy-in for an agile creative method; combining ideas from design thinking and agile methodologies. This increased output by 40%, enabling the team to meet aggressive timelines.
- Won the President's Circle Award for Innovation, the highest team accomplishment at LoyaltyOne, for leading design, development and implementation of NFC mobile wallet app.

Additional Experience
